

AU General Risk Assessment

| Brief Description of Activit | <u>y:</u> | | | Assessor/s: | Date: | | |
|--|------------------------------|--|-----------------|-------------|---|--|--|
| MANUAL HANDLING OF DELI To move to storage area after de required for use. | | uent movement to | areas where sup | | | | |
| Hazard: | Persons at risk: | Risk factor: | | | Control measures required: | Residual Risk: | |
| List what could cause harm from this activity, use appendix A to assist in identifying | List who might be harmed eg | For each hazard, decide level of risk as if you were to do the activity without controls, see appendix B | | | For each hazard. List the measures you will be taking to minimise the risk identified, e.g. appointing competent persons, training received, planning and try-outs, use of personal protective equipment | For each hazard now decide the residual risk after the | |
| hazards | staff, students, visitors | Severity | Likelihood | Risk | | control measures are in place | |
| Work Related Musculoskeletal Disorders (MSDs) | All | Moderate | Possible | Medium | Apply controls as indicated through a manual handling assessment of the task (e.g. using the HSE MAC tool). Limit the size of the load to be carried by one person; store supplies at an appropriate height; do not store loads which would require reaching; stretching or bending down. Appropriate access equipment must be provided and the amount of movement must be minimised, for example, deliveries should be dropped close to a store. Trollies and lifts should be made available. Suitable and sufficient manual handling training should be provided. | Very Low | |
| Spillages | All, environmental | Moderate | Unlikely | Medium | Live loads should be clearly indicated and suitable equipment provided for the movement of these. Packaging should be checked for damage and rectified before being moved. Hazardous deliveries should be clearly marked and any necessary PPE provided. There should be a procedure in place for the movement of hazardous and restricted substances. | Very Low | |
| Movement of Delivery Vehicle | All | Very Severe | Very Unlikely | Medium | Deliveries should be received in allocated delivery bays, away from general pedestrian access. A high-visibility tabard should be worn by those accepting a delivery. | Low | |
| Slips, Trips and Falls | All | Slight | Unlikely | Low | Those working in the warehouse and accepting deliveries should wear steel toe-capped boots. Good housekeeping measures applied to the site. List of trained first aid contacts made readily available. | Very Low | |

AU General Risk Assessment

Appendix A

| Situational hazards Tick | | Physical / chemical hazards Ti | | Health hazards | Tick |
|----------------------------------|--|--------------------------------------|---|--|------|
| Assault by person | | Contact with cold liquid / vapour | | Disease causative agent | |
| Attacked by animal | | Contact with cold surface | | Infection | |
| Breathing compressed gas | | Contact with hot liquid / vapour | | Lack of food / water | |
| Cold environment | | Contact with hot surface | | Lack of oxygen | |
| Crush by load | | Electric shock | | Physical fatigue | |
| Drowning | | Explosive blast | | Repetitive action | |
| Entanglement in moving machinery | | Explosive release of stored pressure | | Static body posture | |
| High atmospheric pressure | | Fire | (| Stress | |
| Hot environment | | Hazardous substance | | Venom poisoning | |
| Intimidation | | lonising radiation | | | |
| Manual handling | | Laser light | | Environmental hazards | |
| Object falling, moving or flying | | Lightning strike | | Litter | |
| Obstruction / exposed feature | | Noise | | Nuisance noise / vibration | |
| Sharp object / material | | Non-ionising radiation | | Physical damage | |
| Shot by firearm | | Stroboscopic light | | Waste substance released into air | |
| Slippery surface | | Vibration | | Waste substance released into soil / water | |
| Trap in moving machinery | | | | | |
| Trip hazard | | Managerial / organisational hazards | | | |
| Vehicle impact / collision | | Management factors | | | |
| Working at height | | | | | |

| Risk matrix – use this to determine risk for each hazard i.e. 'how bad and how likely' | Likelihood of Harm | | | | | |
|---|--------------------|---------------|----------|----------------|----------------|--|
| | Remote | Very unlikely | Unlikely | Possible | Likely | |
| Severity of Harm | | | | | | |
| Negligible e.g. small bruise | Very low | Very low | Very low | Low | Low | |
| Slight e.g. small cut, deep bruise | Very low | Very low | Low | Low | Medium | |
| Moderate e.g. deep cut, torn muscle | Very low | Low | Medium | Medium | High | |
| Severe e.g. fracture, loss of consciousness | Low | Medium | High | High | Extremely high | |
| Very Severe e.g. death, permanent disability | Low | Medium | High | Extremely high | Extremely high | |
