PADLET: A SHARING PLATFORM

DANIELLE KIRK

In this session, I will be introducing the online sharing platform: Padlet. This application is a virtual wall, which allows groups of people to their share ideas instantly using their devices (mobile, tablet, laptop etc.) I will be explaining how I have used Padlet to enhance my own teaching as well as making way for the group to discuss how it could be useful in their own teaching. A presentation of how to use Padlet will be followed by a short demonstration whereby the group will be contributing to a Padlet. We will also discuss how this application can be beneficial for inclusive teaching as well as any negative aspects of the application.
