DESIGNING EFFECTIVE PUBLIC ENGAGEMENT ACTIVITIES

GREG SCANNELL AND MAIRE GORMAN

THE BRILLIANT CLUB

An interactive session considering what are the most effective techniques to utilise in Public Engagement activities, especially for a non-expert audience. There will be opportunities for delegates to share their own best practice and to try out new activities and ideas. The session is based upon some of the training that The Brilliant Club provides for PhD researchers who become tutors on The Scholars Programme and design and deliver courses based upon their research to young people in schools and colleges. The session will also include more information on becoming involved in this widening participation programme.
