

## All-Wales Literacy Test for Entry to Initial Teacher Education and Training Programmes

This test covers the core literacy skills needed in the professional context of teaching, rather than the subject knowledge required for teaching. All candidates are required to pass this test before being accepted onto an initial teacher education and training programme. There are 3 sections to this test: there are 20 marks available in the spelling and punctuation section; 10 marks in the grammar section and 10 in the comprehension section.

### Section One: Spelling and Punctuation

In this section, you will be tested on your ability to identify errors in a learner's writing.

A learner has written a letter to the headteacher of her school asking whether the class can go on a school visit. The letter contains spelling and punctuation errors, which you are required to identify in the questions that follow.

01	Dear Mrs Watkins
05	I am writing on behalf of Class 10B to ask for your permission to go on a school trip. Having taken a vote, Class 10B is unanimous that we would like to go to the centre for alternative technology. We decided to chose this so that we can learn about renewable energy; learn about growing food; and have fun in the children's play area.
10	If we were aloud to go, we think it would benefit our education and would add to the work we have already done on our topic: 'Our Fragile Environment'. Our preperation has included looking at the website were it says that there are "plenty of opportunities to find inspiration."
15	Many of us have friend's who have been there (they go to a different school) and they have told us it's great. Have you ever been
20	After our visit we will be able to advice you about improving our school environment, this will have a positive effect on the whole school.
23	We are hoping that you agree to our plan otherwise Class 10B will be very disappointed Yours sincerely Sioned Davis

###### **The Record**

The Minister for Education and Skills (Leighton Andrews): In February 2011, I set out 20 priorities to tackle underperformance in education in Wales, which included a commitment to focus on literacy and numeracy. This statement provides an update on the progress of the National Literacy Programme and outlines the series of actions that the Welsh Government and its partners are taking to achieve a step change in standards of literacy over the next five years.

Our programme for government states that our aim for education is to help everyone reach their potential, to reduce inequality, and to improve economic and social wellbeing. One of the key ways to ensure that this aim is achieved is by improving education provision for all learners and specifically by improving standards of literacy. Literacy describes a set of skills, including speaking, listening, reading and writing, which enable us to make sense of the world around us. Literacy is more than decoding words on a page or writing grammatically correct sentences. Literacy is about understanding written and spoken language, interpreting what has been written or said, drawing inferences from evidence and being able to communicate effectively. The National Literacy Programme is a five-year programme of action to transform standards of literacy in Wales. It requires that every school in Wales be focused on the development of literacy skills. The groundwork for literacy skills is laid in the early years of primary school. For this reason, we need to ensure that children receive consistently high-quality teaching in the foundation phase, in order to reduce the number of pupils struggling with literacy skills later on in their education. The primary focus of the National Literacy Programme is on increasing the number of children who are taught well first time, and decreasing the number who need individual support to help them catch up or plug gaps in their knowledge and understanding. While our targeted intervention grants have already helped 7,000 primary school children, there is still much to do. To ensure that each child is given every opportunity to succeed, extra support is needed for those falling behind.

We will build on the success of current intervention programmes by exploring how they help pupils at risk of falling behind, or those not achieving their potential.
