

HUMAN GEOGRAPHY

Time Allowed – 1.5 hours

Instructions to candidates: you must answer 2 questions from a choice of 10.

1. How is climate change likely to affect different parts of the world and how might states take the lead in ameliorating these challenges?
 2. How might the use of smart technologies (e.g. smartphones, wearable technologies, biometrics etc.) be changing what it means to be a citizen?
 3. What does human geography have to contribute to understandings of the 2016 European Union membership referendum and how might it help us interpret the results?
 4. What does the UK Government's policies of creating a 'hostile environment' for immigrants tell us about ideas of migration and human mobility?
 5. What insights does studying the sea have for human geography?
 6. Is sustainable development the answer to the world's environmental, social and economic problems?
 7. What responsibilities do geographers have towards the people, places, and processes that they study?
 8. To what extent should development goals emphasize citizens' well-being, rather than increasing their wealth?
 9. Discuss some of the specific ways in which a map can influence our perceptions of the reality it is supposed to reflect.
 10. Many of the world's major cities are experiencing acute housing shortages. With reference to a major city outside the United Kingdom, describe the causes and impact of such shortages, and discuss how they might be tackled.
