Research	p.10
How to apply	p.12

Important information

The programme information published in this brochure was correct at time of going to print (June 2026) and may be subject to change. Prospective students are advised to check the definitive programme information, including entry requirements, that is available on our website before making an application, to ensure that the programme meets their needs.

Welcome

Welcome to Aberystwyth School of Veterinary Sciences - the first of its kind and the only Veterinary School in Wales.

As someone passionate about veterinary training and the role the veterinary profession can play in society, not only in Wales but globally, I warmly invite you to consider studying with us.

Our jointly hosted Bachelor of Veterinary Sciences (BVSc) degree offers you a unique opportunity to train at two world-leading scientific and educational institutions: the Royal Veterinary College (RVC) and Aberystwyth University.

Established in 1872, Aberystwyth University has been delivering innovative research in the Agricultural, Animal and Biological Sciences for 150 years.

Established in 1791, the RVC is the UK's largest and longest established independent veterinary school and is a member institution of the University of London. The RVC is ranked as the world's number one veterinary school in the QS World University Rankings by subject.

Lecturers at Aberystwyth University and the RVC are not only world-class researchers and clinicians who are passionate about their field; they are highly qualified teaching professionals.

Our newly accredited veterinary nursing degree embeds the RCVS Day One Skills and Competences for Veterinary Nurses alongside contemporary veterinary nursing topics.

If Veterinary Sciences is your passion, why not join us on an Open Day to meet our staff and view our excellent teaching and research facilities. You will discover what makes Aberystwyth such an incredible place to live and learn.

Professor Darrell Abernethy

Head of Aberystwyth School of Veterinary Sciences

Facilities

Veterinary Education Centre

Situated on Penglais Campus, the Veterinary Education Centre provides clinical skills and companion animal handling training rooms, facilities for teaching anatomy and areas for students to discuss and prepare before classes.

Lluest Equine Centre

The Equine Centre is a purpose-built teaching facility and a British Horse Society (BHS) Approved Training Centre. Facilities include an international-sized indoor arena, outdoor school, horsewalker and round pen, loose boxes and demonstration boxes and a full set of show jumps and fillers.

University Farms

The university farms based at Gogerddan (sheep and beef farm), Morfa Mawr (low-lying pasture), Trawsgoed (dairy farm) and Pwllpeiran (upland) extend to over 800 ha in total, and range from 0-600 metres above sea level.

Pwllpeiran

The Pwllpeiran Upland Research Centre is a centre for the study of upland farmed ecosystems located in the heart of the Cambrian Mountains, West Wales, and home to a herd of alpacas.

Veterinary Training Clinic

A new replica veterinary clinic opened at Aberystwyth University in an expansion of Wales's only School of Veterinary Sciences in 2025. The new clinic has waiting, examination and treatment areas along with key equipment used for small animal care.

Veterinary Sciences

BVSc (Hons) | D105 | 5 years

This jointly-hosted Bachelor of Veterinary Sciences (BVSc) degree offers you a unique opportunity to train at two world-leading scientific and educational institutions: the Royal Veterinary College (RVC) and Aberystwyth University. This exciting course combines the scientific and clinical expertise from both organisations to help students gain wide-ranging veterinary training, from cattle to pocket pets, clinical practice to industry, from animal health to public health.

Course Content

Teaching is organised in strands. These strands are visited on multiple occasions, initially focusing on the healthy animal, and progressing through diseases of different systems, their investigation and management. There are also non-system strands that focus on the underpinning science and the impact of animal disease on public health.

In the first two years you will be based in the heart of Wales at Aberystwyth University, studying the biology underpinning Veterinary Sciences, acquiring basic farm animal, horse and companion animal handling and examination skills, and developing your communication, problem-solving and teamworking skills. Aberystwyth University has a long history of animal health teaching and research and is committed to educational excellence.

In your third, fourth and fifth years you will be based at the RVC's Hawkshead Campus in Hertfordshire where you will acquire the advanced knowledge and practical skills in the clinical sciences necessary for you to become a registerable veterinarian. During this period your clinical training will be undertaken in a range of the RVC's clinical facilities and affiliated veterinary practices as well as specific rotations at Aberystwyth University focused on production animal issues relevant to Wales.

The RVC has three outstanding academic and clinical departments. Lecturers at Aberystwyth University and the RVC in each department are not only world-class researchers and clinicians who are passionate about their field; they are highly qualified teaching professionals.

At Aberystwyth University, students will benefit from the extensive university farms, Lluest Equine Centre and other teaching facilities

Practical and Clinical Teaching

Animal Husbandry Extra-Mural Studies (AHEMS)

AHEMS is undertaken during the first two years of the programme. AHEMS placements are designed to help you consolidate your learning about animal husbandry, develop animal handling skills, and learn about animal industries. You must complete 10 weeks of AHEMS before entry to the third year of the course. To gain a stronger insight into Welsh veterinary needs, you are encouraged to undertake a proportion of these AHEMS in Wales.

Clinical Extra-Mural Studies (ClinEMS)

ClinEMS is the time dedicated to gaining practical clinical experience in the latter years of your Veterinary Sciences programme to support your learning and clinical experience. ClinEMS will allow you to gain experience in a variety of different clinical and other veterinary-related organisations, where you will consolidate your learning about diagnosis and management of animal diseases, enhance your practical clinical skills, and acquire greater understanding of how veterinary organisations operate.

During the third, fourth and fifth years you will undertake ClinEMS placements, totalling 20 weeks. To gain a stronger insight into Welsh veterinary practices, you are encouraged to undertake a proportion of these ClinEMS in Wales.

Intramural clinical rotations

In the final two years of the course, your clinical experience will focus on observation, discussion and practical experience as a clinical team member within the RVC hospitals, and in clinical enterprises in which the RVC is a collaborating partner. During your time on rotations your learning and understanding will be complemented by a broad range of lectures, seminars and workshops.

Widening Participation

Aberystwyth University and the Royal Veterinary College are committed to widening access and we welcome applications from students of all backgrounds. The academic and non-academic attainment of a candidate will be reviewed against socio-economic and educational background to provide a more complete overview of an applicant's attainment and potential. Please visit www.aber.ac.uk/vet-sci for more details.

Employability

The Royal College of Veterinary Surgeons (RCVS) accredits UK veterinary degrees to ensure new veterinary surgeons are fit to practise on graduation, and thus eligible to join the RCVS Register as Members of the Royal College of Veterinary Surgeons. Only those individuals registered with the RCVS can call themselves veterinary surgeons and practise veterinary surgery in the UK. The RVC, Aberystwyth University and the RCVS are working closely together to ensure that our BVSc course meets the standards required for the RCVS to grant full accreditation in 2026 when the first cohort of students graduate.

Graduates develop an in-depth scientific knowledge that may be applied to a broad range of career pathways including the spectrum of clinical practices, veterinary and biomedical research, veterinary public health and food security, conservation medicine and a range of activities with government and veterinary-related industries. Additionally, having trained partially in Wales throughout the degree, graduates will be extremely well suited to continue their career in Welsh practices and other veterinary institutions and employers.

Module list

The strands making up the basis of teaching are as follows:

From first to third year:

- Principles of Science
- Cardiovascular, Respiratory, Locomotor and Skin Systems
- Alimentary, Endocrine and Urogenital Systems
- Neurology, Ophthalmology and Special Senses
- Lymphoreticular and Haematopoietic
- Population Medicine and Veterinary Public Health (PMVPH)
- Principles of Veterinary Practice and Evidence-Based Medicine.

During the fourth and fifth years:

The majority of teaching during the fourth and fifth years of the programme is in the form of clinical rotations, where you will work in small groups in a variety of clinical environments.

You will participate in both intramural rotations and ClinEMS placements across species and disciplines. You will also undertake a research project of your choice.

Key Facts

Typical offer:

A level entry requirement: AAA (including Biology and Chemistry) and a third subject which should not overlap with Biology or Chemistry, excluding general studies. For more details regarding international and contextual offers please visit: www.aber.ac.uk/vet-sci

Interview:

Multiple mini-interviews (MMI) will be held at Aberystwyth as part of the selection process

Supplementary form:

As part of your application you are required to complete our Applicant Supplementary form. More details can be found on our website: www.aber.ac.uk/en/vet-sci/applicant-supplementary-questionnaire

Work experience requirements:

Before applying you must have completed a minimum of 70 hours of work experience (paid or voluntary) in one or more veterinary practices and 70 hours in a variety of different animal environments (excluding your home environment, family business or pet ownership), 35 hours of which must be farm animal or equine-related. This work experience must be obtained within the 18-month period directly preceding the application deadline.

Veterinary Nursing

FdSc | D31F | 3 years

On our Veterinary Nursing foundation degree, you will study animal health and management topics relating to small animals (dogs, cats, small mammals) and horses, with some reference to large animals. As the home of the only Veterinary School in Wales (Aberystwyth School of Veterinary Sciences), we have excellent facilities to support your studies, including a clinical skills lab, research and anatomy laboratories, a veterinary training clinic, an equine teaching centre and university farms. The course combines theoretical and practical learning, with a work placement in a veterinary practice as an integral part of the course.

Modules in year 1 and 2 are directly linked to the Royal College of Veterinary Surgeons (RCVS) Day One Skills for Veterinary Nurses, in preparation for a year-long work placement in an approved training practice. Initially, topics including animal health and principles of veterinary nursing provide an understanding of the basic concepts surrounding veterinary nursing. These are then applied in the year 2 topics, before commencing a year-long work placement. The placement commences halfway through year 2 and finishes in the middle of year 3. The final modules in year 3 include an optional focus in either nursing of exotics or large animals depending on which speciality you would like to work in. There is also an emphasis on leadership, community nursing and One Health in the final year.

Your work placement will be provided by one of our registered training practices, and you will be allocated this by a placement tutor. Whilst on work placement, you will complete an online log of your clinical skills development, the Nursing Progress Log. As part of the licence to practise requirements of the RCVS, you will complete a minimum of 1800 hours on the placement.

Employability

By successfully completing the foundation degree, you will be eligible to apply to register with the RCVS as a registered veterinary nurse. The course is provisionally accredited by the RCVS. As a registered veterinary nurse, you will be eligible to work in general practice, referral hospitals, charities providing veterinary services, laboratories, pharmaceutical industries and within animal collections such as zoological parks. RCVS Accreditation is recognised in many countries through ACOVENE. You will also be able to continue your studies with a BSc Top-up or an RCVS Certificate in Advanced Veterinary Nursing.

Module list

First year:

- Professional Practice
- Anatomy and Physiology
- Animal Health and Management
- Principles of Veterinary Nursing
- Principles of Diagnostic Techniques
- Preparing for Placement

Second year:

- Principles of Pharmacology and Anaesthesia
- Medical Nursing and Critical Care
- Surgical Nursing
- Work Placement

Final year:

- Applied Veterinary Nursing
- Nursing of Exotics OR Nursing of Large Animals
- One Health for Veterinary Nurses

Key Facts

Typical offer:
UCAS tariff points: 96
IB: 26 with 5 points in Biology at Higher Level

Assessment: All modules in year 1 and 2 include an examination assessment as an RCVS requirement. Each module has an element of coursework, usually 50% weighting.

Field trips/fieldwork: Yes

Important information: This course is provisionally accredited by the RCVS

Research

Ongoing research at the Aberystwyth School of Veterinary Sciences.

Research is an important part of academia and, despite being only four years old, the ASVS academics are making significant impacts in researching important issues, both in Wales and abroad. Here is a brief list of what we are doing:

Antimicrobial resistance (AMR)

AMR – where pathogens no longer respond to medicines – is one of the greatest public health problems globally and is regarded as a major contributor to millions of deaths each year. The treatment of animals is a factor in this so we are investigating how we can ensure antimicrobials are used in an optimal way, both with pets and on farms.

Metabolomics and Microbiomes

We are using the latest technologies to explore the world of organisms that live in animals and biochemical changes associated with disease, so we can better understand how to diagnose and control infection.

Precision Livestock Farming

We are exploring how technology can be used on farms to optimise animal health, welfare and productivity, for example, how we can utilise AI to detect ewes that are about to lamb.

Student training

Student training – in both veterinary science and veterinary nursing – has benefitted from advances in technology and teaching methods. We are investigating how we can optimise student experience and education through the use of animal “models” and in practical assessments (so-called “OSCES”). We are also exploring how best to utilise 3-D models and digital innovation for teaching anatomy.

What’s in a kneecap?

A lot apparently! We are looking at a range of species to better understand the evolution of the kneecap as a “gear switch”, with application to human surgery or prosthetics, and development of robotics.

Avian health

We are looking at the impact of pathogens in endangered African penguins, eagles and vultures. Closer to home, we are also looking at what bugs are found in some of our more common species, such as starlings and herring gulls, and if these present a risk to people.

One Health

We are using One Health approaches to investigate how zoonotic diseases can be better controlled in countries that do not have the resources to address them.

The application process

1 Apply through UCAS.com

Check the UCAS deadline on UCAS.com.
Aberystwyth University institution code for the FdSc: A40.
The institution code for the BVSc is the RVC code: RVET R84.

TOP TIP: You'll be given a 10-digit UCAS ID number. Keep this to hand as you'll be asked for it many times.

2 The University will consider your application

TOP TIP: Use UCAS Hub to keep an eye on your application.

3 The offer will show on UCAS Hub

The University's decision will show on UCAS Hub - if you've been made an offer, it will tell you what grades you need to achieve to secure your place.

4 Decide where to go

Once you've received all your offers, you'll need to decide which university you want to go to, within a set time. This is when you'll need to note which universities will be your Firm and Insurance choices.

5 Accommodation

Once you've chosen your Firm/Insurance choice you'll be invited to apply for accommodation.

6 Results day

UCAS Hub will tell you whether your place is confirmed at your Firm choice. If you don't get the grades you'd hoped for, you may want to consider entering Clearing.

7 Start packing!

Remember to keep an eye on your emails for information about arrival and welcome activities.
