

3.1.3 Adding Meta Data

Note: You might use similar meta data on many pages, with the addition of new keywords. You could “duplicate” the meta data from another section and then add your new keywords for this page – see [Information Sheet 3.3](#) for more information on reusing content.

1. Open the Site Structure and browse to the section you want to add content to. Click on the name of the section to open it for editing.
2. The 'General section details' page appears. Click on the 'Content' tab.

Content in this section

Display 10 records Filter:

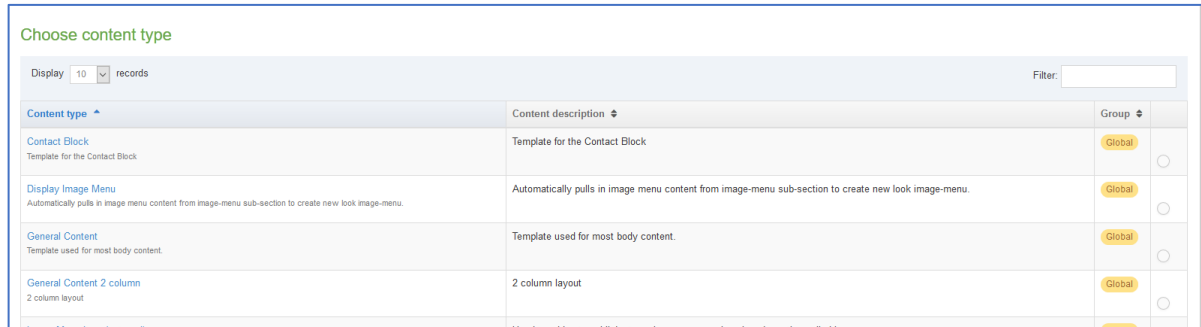

Order	Name	Version	Status	Last modified	Publish date			
+	About me general content General Content	1.2	Pending	November 28, 2017 3:07 PM	N/A	Actions	↑	
+	training metadata Meta Data	1.0	Approved	November 28, 2017 12:19 PM	N/A	Actions	↑	
+	Web Team Contact Autumn Contact Block	1.0	Approved	October 19, 2017 2:48 PM	N/A	Actions	↑	
+	About me content 2 General Content	0.5	Pending	January 18, 2018 10:11 AM	N/A	Actions	↑	
+	training content General Content	0.1	Pending	January 18, 2018 10:13 AM	N/A	Actions	↑	

Showing 1 to 5 of 5 entries

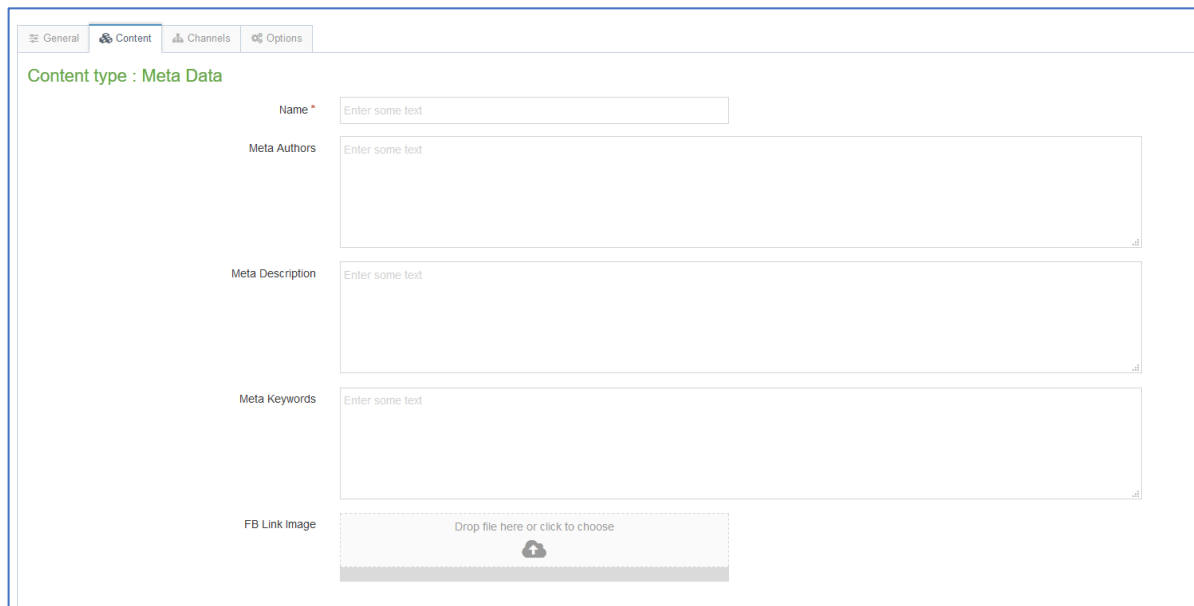

< 1 >

3. Click on the 'Create Content' button on the right.

4. The 'Choose content type' page appears – click on 'Meta Data' in the list that is displayed.

5. The Meta Data Template will now appear.

6. Insert a name for your new content in the Name box. This isn't seen by people using the web site, but it is important that you choose something that will make sense to other CMS users.

7. Insert Meta Authors – e.g. 'Aberystwyth University Web Team'

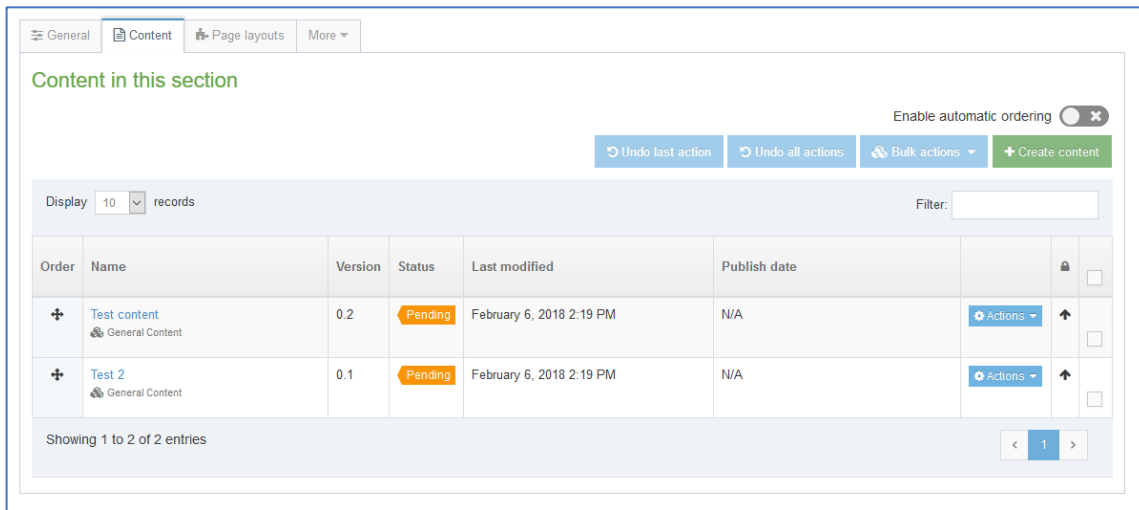

8. Insert Meta Description – e.g. 'IBERS News Page'

9. Insert Meta Keywords – e.g. 'IBERS, Biology, Rural, Aberystwyth, University, AU, Institute, Biological, Environmental, Sciences, News'

- When you have finished adding content click on the 'Save changes' button or click on the small triangle at the end of the button and select 'Save as draft' if you are going to come back to this piece of content later and don't want it to enter the approval process.
- A message will appear at the bottom of the page to tell you that the content has been successfully added:

- You will be returned to the Content tab, where you can see your newly added content listed along with any other content that you have added to this section.

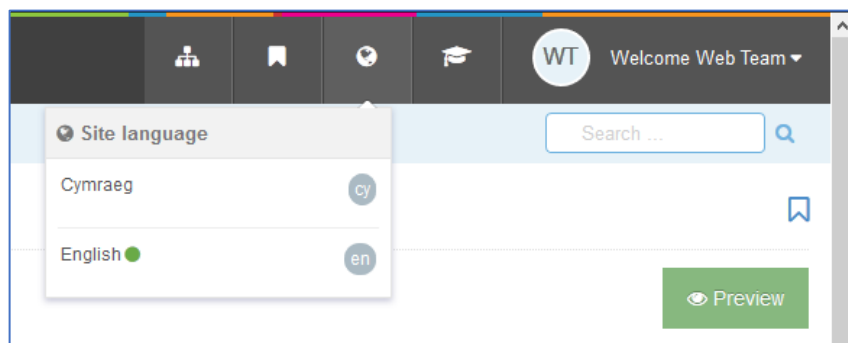

- You will notice that the content appears with the Status 'Pending' (or 'Draft'). Pending content needs to be approved before being published. See [Information Sheet 6](#) for more information on approval (Moderators only). Draft content will not enter the approval process – you can continue to edit it and when you are ready for it to enter the approval process you will be able to click the 'Save changes' button to save it.

Creating the Welsh Version of your Meta Data

Note: You should only create the Welsh version of your content when you have the Welsh text ready. If you have sent your English text to Translation, wait for it to return before creating the Welsh content.

1. Click on the 'Site language' button at the top of the screen and select Cymraeg.

2. The Welsh version of the section's 'General section details' page appears. Click on the Content tab.
3. The Name of the content appears as 'Not translated', as it hasn't yet been named in Welsh. Click on the name of the piece of content to modify it.

Note: If there are lots of new pieces of content which haven't had their Welsh title set, it can be hard to find the right one that you need to work on – move your mouse over the words Not translated and a small box containing the English title of the content will appear.

4. Insert a name for your content – this can be in English or Welsh depending on your preference. This isn't seen by people using the web site, but it is important that you choose something that will make sense to other CMS users.
5. Insert Meta Authors in Welsh – e.g. 'Tim We Prifysgol Aberystwyth'
6. Insert Meta Description in Welsh – e.g. 'Tudalen Newyddion IBERS'

7. Insert Meta Keywords in Welsh – e.g. `IBERS, Bioleg, Gwledig, Aberystwyth, Prifysgol, PA, Sefydliad, Biolegol, Amgylcheddol, Gwyddorau`
8. When you have finished adding content click on the 'Save changes' button or click on the small triangle at the end of the button and select 'Save as draft' if you are going to come back to this piece of content later and don't want it to enter the approval process.
9. A message will appear at the bottom of the page to tell you that the content has been successfully updated:

10. You will be returned to the Content tab, where you can see your newly added content listed along with any other content that you have added to this section.
11. You will notice that the content appears with the Status 'Pending' (or 'Draft'). Pending content needs to be approved before being published. See [Information Sheet 6](#) for more information on approval (Moderators only). Draft content will not enter the approval process – you can continue to edit it and when you are ready for it to enter the approval process you will be able to click the Update button to save it.
