

Vacancy

Organisation and Contact Details

Gradwell Dot Com Limited
26 Cheltenham Street
Bath
BA2 3 EX

Gradwell is a rapidly growing Internet Services Provider who provides Internet Telephony, broadband, email and web hosting to over 9,000 UK Small Businesses.

Our products make best use of the latest technology, are backed-up by expert support, relied upon by thousands of UK small businesses and designed for entrepreneurial & growing business customers with an eye to the future.

We are a pioneer in the exciting new world of Internet communications and our company is growing rapidly, bucking the current economic trend.

We were named in Deloitte's 2009 and 2010 Tech Fast 50 lists, were named Best Internet Telephony at the 2010 ISPA awards and were named Best UK Business Telephony provider by ITSPA in 2008.

We also won a number of awards in 2004 and 2005 in various DTI schemes including "Best use of Broadband" for our VoIP product and "Best Teleworking Company" and "Best Online Customer Service" for both of which we were highly commended. We are a team of 50 with turnover of £4.1 million.

Job Details

VoIP Engineer – Student Placement – 1 year
Start date – Summer 2012
End date – Summer 2013

Working within a small team of VoIP Engineers in the Engineering Department, the primary responsibility of this position is to develop and maintain new and existing products and systems according to the specifications and guidance provided by the Head of Engineering. Our VoIP Development Team creates and maintains Gradwell's multi-award-winning Internet Telephony service, providing cloud-based telephone exchange functionality to thousands of UK businesses. We are in the process of doubling the capacity of this service to meet rising demand, and building up a second VoIP environment based in Manchester to provide our customers with additional security and service
